

## Professional Guest Internet

NuiNet sits between your modem and your guest wired and wireless network, protecting devices on the office side and managing Internet access and usage on the guest side.

### Flexible

- Incorporates your branding
- Set your own tariffs and top up options

### Powerful

- Fibre friendly
- See who is online, how much they have used and topped up
- Add, top up and remove user access at will

### Safe

- Fire walls the guests from your office machines
- Prevents access to parts of the Internet susceptible to copyright monitoring

## Flexible Powerful Safe

We have built a reputation for quality software, ease of use and strong technical support.
